

STATEMENT OF PURPOSE

RS20608C1

This legislation would: 1) expand the Idaho Health Freedom Act to include greater protections for Idaho employers, insurers and medical providers, and 2) stop the operability of the Patient Protection and Affordable Care Act's discretionary provisions while providing a verification process to protect taxpayers against the unnecessary implementation of the PPACA during fiscal year 2012.

FISCAL NOTE

No impact to the general fund. The verification process could be accomplished with existing resources. Additionally, by rejecting the PPACA's discretionary components, the state will, in fact, save taxpayer resources from being expended on a law whose constitutionality is still in question.
